

## Orientation

Ensure that you have read about using the plan in the Program Guide.

### Book summary

Read the following summary to the student.

Many creatures and some plants eat insects. How do they catch them?

### Introduction

Foster interest and activate the student's background knowledge. Be concise – focus on motivating and involving the student. Encourage prediction by using the text and illustrations on the cover of the book. Discuss new vocabulary and remind the student to use the glossary (when applicable). Also remind the student to ask him/herself questions before, during and after the reading.

Ask the student to tell you about some insects. Tell the student that insects live in a huge variety of places. Ask the student why catching insects could be difficult for some creatures. Now look at the cover of the book and discuss what the bat is eating. Tell the student that this book gives information about other creatures that eat insects and how they go about catching them.

## Conferencing

### Check how well the student reads

When you are conferencing, the student reads all or part of the book to you. Then:

- praise, pause, and prompt appropriately;
- check for accuracy (by counting mistakes) and fluency;
- check for understanding by using one or more of the following methods:
  - asking the comprehension questions provided and any others that seem necessary;
  - asking the student to retell the story in their own words;
  - asking questions about and discussing aspects of the story, such as the theme, plot, main ideas, sequence and characters;
  - encouraging the student to confirm the predictions they made during the orientation.

### Decide what the student does next

Next recommend that the student:

- practices some more on the same book, with or without the audio;
- completes one of the activities provided that is related to the book;
- practices with another book from the same level; or
- is assessed for promotion to the next level.

## Comprehension questions

1. What does the archer fish eat?
2. What other insect eaters does the book tell you about?
3. What words are used to describe the action of each creature when it catches an insect?
4. What does the trapdoor spider do with the insect it bites?
5. How is the Venus flytrap different from other plants?

## Answers to the Comprehension questions

1. Beetles.
2. Bat, Spider, Venus flytrap.
3. Spits, swoops, grabs, jumps, bites, shuts.
4. It drags it back to its hole and eats it.
5. Most plants don't eat insects.

## Supporting English Language Learners

The following are suggestions for optional lessons to take with your English language learners. See the overview chart in the Program Guide for a summary of the text features of this book.

### Purpose

Identifying and using a variety of action verbs appropriately

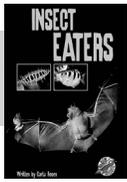

### Introduce the concept and practice

Identifying specific word forms helps students to develop an understanding of sentence structure and enables them to monitor appropriate use.

When the student is familiar with *Insect Eaters*, read it through together and identify the action verbs. Get the student to list them. Discuss the list, checking that the student is familiar with their meanings.

As a follow-up oral exercise, work with the student to use the verbs in a new sentence. Provide prompts and support as needed. Using the verbs in different contexts will help to consolidate the student's understanding.

w	a	t	e	r	t	h	i	s

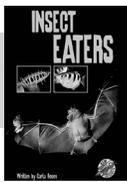

**Words to find:**

- |      |      |       |       |       |        |
|------|------|-------|-------|-------|--------|
| and  | at   | back  | bat   | by    | can    |
| come | eat  | every | fish  | for   | ground |
| has  | into | is    | of    | night | out    |
| this | to   | up    | water |       |        |

Use the letters that are left to make a word that tells what spiders eat.

.....

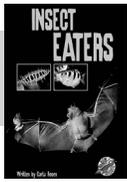

- ★ Spin the numbered spinner.
- ★ The highest number starts.
- ★ You need to spin the exact number to move onto the END square.

<p><b>START</b> Many animals eat insects.</p>	<p><b>1</b> Fish eat insects. Name two numbers. If you spin one of them, go on to 4.</p>	<p><b>2</b></p>	<p><b>3</b></p>
---	--	-----------------	-----------------

<p><b>19</b> Spiders eat insects Spin again. If you spin an odd number, go on to 23.</p>	<p><b>20</b></p>	<p><b>21</b></p>	<p><b>22</b> A spider jumps out of a hole and bites a cricket. Go back to 18.</p>		<p><b>4</b></p>
<p><b>18</b></p>	<p><b>END</b> Some plants eat insects, too!</p> 		<p><b>23</b></p>		<p><b>5</b> A fish spits at a beetle. Spin again. Go forward that number.</p>
<p><b>17</b></p>	<p><b>30</b></p>		<p><b>24</b></p>		<p><b>6</b></p>
<p><b>16</b> A bat swoops and grabs a moth. Go back four spaces.</p>	<p><b>29</b></p>		<p><b>25</b></p>		<p><b>7</b> A fish snaps up a beetle to eat. Go forward three spaces.</p>
<p><b>15</b></p>	<p><b>28</b></p>	<p><b>27</b></p>	<p><b>26</b> A spider drags a cricket back to its hole and eats it. Go on to 29.</p>		<p><b>8</b></p>
<p><b>14</b></p>	<p><b>13</b></p>	<p><b>12</b></p>	<p><b>11</b> A bat can eat hundreds of insects every night. Miss a turn.</p>	<p><b>10</b></p>	<p><b>9</b> Some bats eat insects. Spin again. Go back that number.</p>

**Name:** ..... **Date:** .....

Fill in the chart to show the insect eaters, the insects they eat, and how they catch them.

Insect Eater	Insect It Eats	How It Catches the Insect
Archer fish		
	Moth	
		It waits, then jumps and bites the insect. Then it drags it back to its hole and eats it.
	Fly	

Write on the back of this page if you need more space.

**REMEMBER** Use the extra space to write about another insect eater.
